

HIGHLIGHTS

The new functionality of z/OS 2.1, including 8 character Job Class names, is supported and further exploited.

Our “next generation” of support services are significantly improved and easier to use:

- *The ThruPut Manager documentation library has undergone extensive reorganization and simplification*
- *A new ThruPut Manager online education service offers learner-paced training you can take at your convenience*
- *A new MVS Solutions website offers enhanced customer support services*

New packaging will simplify product installation and deployment:

- *The former TM/base, TM/DCS, TM/JBS and TM/UCS components are included in a cohesive, integrated ThruPut Manager package at no additional cost*
- *The former TM/DBS component is included with the ThruPut Manager package*

ThruPut Manager

Only certain highlights of ThruPut Manager have been discussed here. For further information, please contact us as noted on the first page.
